Electrolyte Glow Hydration Serum

Powered by **Hydrafence™**, **Sea Minerals extract**
and **Phytoplankton extract**

7131FOR5

What if your skin could glow like your favorite scene?

Let yourself be carried away by the movies and series that shaped your memories.

As the second step of the routine, this ultra-moisture serum floods the skin with deep hydration and a cinematic glow, syncing light, texture, and emotion in one effortless step.

Sea Minerals and Hydrafence™ replenish moisture, while Phytoplankton extracts enhance luminosity and skin vitality, leaving a glossy, slightly tacky finish that grips makeup perfectly like skin ready for the spotlight.

Designed as an immediate skin booster, it hydrates, preps, and puts your skin in focus for what comes next.

Sync your ritual and let your skin shine like your best scene, glossy, hydrated, unforgettable.

Electrolyte Glow Hydration Serum

Powered by **Hydrafence™**, **Sea Minerals extract**
and **Phytoplankton extract**

7131FOR5

PROCEDURE

1. Premix the carrageenans in glycerin and add it to the rest of Phase A under agitation. Heat to 75°C.
2. Disperse Phase A with high shear agitation, 5000rpm during 5 minutes
3. Once the Phase A is homogeneous, cool down to 40°C under agitation and add ingredients of Phase B
4. Disperse under high shear agitation again for 1 minute
5. Premix Phase C and add it to the bulk under agitation
6. Once homogeneous, stop the agitation and let it cool down
7. Once at room temperature the formula gets a jelly-like texture that can be broken down by agitation before filling

CONTROL

Appearance: Translucid aqueous gel
pH: 5-5.5
Viscosity (100 rpm, 20°C, spindle 6): 200-900 cPs
Stability Test: 3 months at 50°C, 40°C, RT, 4°C

DIRECTIONS

Apply the serum on clean and dry skin, gently massaging it in for a glossy and moisturized skin

TARGET

for those who want an immediate skin booster, to moisturize and prep the skin for the next step
